

I listen to K-LOVE radio network and feel that it has an incredible impact on our community. Whatever your religious affiliation if any, you cannot deny the impact on people's lives who listen to this great network. People who are hurting find relief and acceptance, people who need Jesus find Him, and people who just need someone to listen, find open hearts and ears. If K-LOVE were to replace by a LPFM broadcaster providing other programming, thousands of people would be left without anywhere to turn in their time of need. Not to mention the thousands of others who listen to K-LOVE just for daily encouragement to make through each day. Or those who want their children to know that some good does exist in this world. I strongly urge you not to let LPFM stations to take priority over current FM translator service.
